

Pre-Treatment of raw water

Drinking water is mandatory as the basis for the production of pharmaceutical water, but such water is not available everywhere in the necessary quality and quantity and a treatment of the drinking water is necessary.

ULTRASTILULTRASTIL pre-treatment systems are used to protect downstream systems in adverse raw water conditions and ensure that the entire production system works reliably.

ELITE RSELITE RS is a series-connected soft water system for the most stringent hygiene requirements. The ELITE RS generates soft water using the ion exchange process.

ELITE RS-SSeries-connected hot water sanitization soft water system for the most stringent hygiene requirements with optimum performance.
